

Pass / Fail Grading System

Mobile-first field grading & automated daily reporting

UI / UX OVERVIEW & ADMIN SETUP

Prototype look-and-feel · all data configurable in-app

What it does — at a glance

For graders (the app)

- Sign in with a private 4-digit PIN
- Pick a topic, then lock event "sides" for the session
- Pick companies; rosters combine into one chart
- Tap-to-fill groups; red X to remove/swap anyone
- Grade with big Pass / Fail / Memo buttons
- Fail & Memo reveal reasons + a note
- Run another round (same or swapped roles)
- Saves instantly · works offline · never double-counts

For reports (automatic email)

- Sends 1 PM Arizona, only on days with new data
- Recruit → own results · Captain → their company · Boss → all
- HTML email + color-coded PDF (green / yellow / red)
- Per-event %, with side breakdown + combined
- "Who needs reps" by-attempts list for leaders
- Low-attempt flag mid-week; legend on every page

Fully configurable

- Companies, captains, bosses, recruits, topics, events, sides
- Reasons, PINs, colors %, thresholds, schedule, legend
- Nothing hard-coded — all edited in the app

EVERY SCREEN — THE GRADER FLOW

Pass / Fail Grading System

Mobile-first field grading & automated daily reporting · built for graders, zero training

PIN → TOPIC → LOCK SIDES → COMPANIES → BUILD GROUPS → GRADE → REPEAT → AUTO-EMAIL REPORTS

QUICK ATTACK
A. Carter

PASS

FAIL

MEMO

6 · Grade: Pass / Fail / Memo

Grade · Group 1 1/4

Carter Patel

Select reason(s) — FAIL

Improper hose lay

Slow to charge line

Wrong hydrant wrap

Out of sequence PPE not donned

Optional note / memo detail...

Save Reason(s)

7 · Fail reveals reasons + note

Round Complete 4/4

✓

All 4 groups graded
8 immutable attempt rows saved this round.

WHAT NEXT?

Run again — same roles

Run again — swap roles

End session

Next round opens on the chart first — X anyone who left and drop in a replacement.

8 · Round complete (run again)

Admin · Config
